

## Northern Plains Climate Hub

U.S. DEPARTMENT OF AGRICULTURE

**USDA-ARS Postdoctoral Research Agronomist/Soil Scientist/Ecologist Position – 1 vacancy among the following locations (Mandan, North Dakota; Brookings, South Dakota; Clay Center, Nebraska; Fort Collins, Colorado)**

The USDA Agricultural Research Service, Northern Plains Climate Hub is seeking a Postdoctoral Research Associate (Research Agronomist/Soil Scientist/Ecologist) to be based in either Mandan ND, Brookings SD, Clay Center NE, or Fort Collins CO, for a two-year appointment, with the option to extend to a total of four years based on funding and performance. Ph.D. is required. Salary and benefits are commensurate with a GS-11 (step 1) level, which vary by location. Citizenship restrictions apply.

The major duties and responsibilities of this position are: 1) to synthesize existing scientific literature and data about the effects of climate change on cropping systems and/or integrated crop-livestock systems within the Northern Plains region--making it more accessible and actionable for working land managers and decision-makers; 2) collaborate with other scientists, outreach professionals, farmers/ranchers and other food system participants to identify and evaluate potential climate adaptation and mitigation strategies for the region; 3) co-design, facilitate, and evaluate interactive outreach activities and resources, such as agricultural peer-to-peer learning opportunities, field demonstrations, fact-sheets, website materials, and decision-support information or tools; and 4) engage in, contribute to, and sometimes lead Climate Hub initiatives, peer-reviewed publications, administrative reports, and meetings.

This position requires a Ph.D. in Agronomy (Series 0471, view requirements at <https://bit.ly/3JdEp4i>), Soil Science (Series 0470, view requirement at <https://bit.ly/3Z02rpn>), Ecology (Series 0408, view requirements at <https://bit.ly/3kLPPCs>), or a closely related field. Practical knowledge of climate and soils or crops is helpful, along with an ability to interpret experimental designs and statistical analyses. Effective written and verbal communication, especially with the general public, is required. A strong interest in pursuing outreach as a career is desirable. Experience co-producing outreach or research with underserved communities is also desirable. Demonstrated ability to work both collaboratively and independently is needed.

To apply, please send a cover letter (noting which of the advertised locations you would be willing to consider working from), CV, and contact information for 3 professional references to Dr. Dannele Peck ([dannele.peck@usda.gov](mailto:dannele.peck@usda.gov)) or USDA ARS, 1701 Centre Ave., Fort Collins, CO 80526. This advertisement will remain open until the position is filled.

*USDA/ARS is an equal opportunity provider and employer.*
